PROFILE

IT and Network Engineer with over 3 years of experience in infrastructure, networking, system administration, and troubleshooting. Full Stack .NET Developer and Site Reliability Engineer with hands-on experience in building and maintaining scalable, high-availability systems. Worked at Sure Global Technology, contributing to government platforms and supporting critical systems for the Saudi Ministry of Tourism and the Saudi Ministry of Municipal and Rural Affairs and Housing, ensuring reliability, performance, and SLA compliance. Previously served as a Teaching Assistant at the Technological Military College (TMC), supporting students in programming and system design.

PROFESSIONAL EXPERIENCE

Software Engineer – SCISP Project 2026 – Present
Sure Global Technology Saudi Arabia

- Backend development using ABP Framework.
- Workflow implementation using Optimajet Workflow Engine.
- Contributing to enterprise workflow-driven systems.

Site Reliability Engineer - SCTH Project 04/2025 – 01/2026
Sure Global Technology Saudi Arabia

- Production monitoring & incident management (SLA / RCA).
- Ensuring high availability and system stability.
- Supported government platforms for the Saudi Ministry of Tourism.

Teacher Assistant 12/2023 – 12/2024
Technological Military College (TMC) Naser City, Egypt

- Assisted students in IT infrastructure fundamentals, networking, and system administration.
- Supported troubleshooting of hardware, software, and network connectivity issues.
- Delivered explanations of networking concepts including TCP/IP, DNS, DHCP, and basic network security.
- Introduced students to operating systems, databases, and system design concepts.

INTERNSHIPS

Cybersecurity Trainee – ITI & Palo Alto Networks (Online)
• Completed hands-on training in cybersecurity fundamentals, network security, and threat detection in collaboration with Palo Alto Networks.

IT & Networking Training (Online)
• Completed training in networking fundamentals, routing & switching, and network troubleshooting.
• **Topics:** TCP/IP, Subnetting, DNS, DHCP, CCNA Concepts

IT & System Administration Training – Coursera (Online)
• Completed courses in IT support, networking basics, and system administration.
• **Topics:** Networking Fundamentals, Linux, System Administration

EDUCATION

Faculty of Computer and Information, Minya 10/2019 – 06/2023
Bachelor of Computer Science Minia

English Castle Institute, Turkey
B2 Level Certified

06/2021 – 03/2023
Turkey

MODLI Institute, Cairo
A2 level

02/2022 – 06/2022
Cairo

PROJECTS

Security Monitoring & Incident Detection System (SRE & Cybersecurity Focus)

- Built a monitoring system to detect suspicious activities, analyze logs, and improve system availability and security.
- **Technologies:** Linux, SIEM Basics, TCP/IP, Network Monitoring Tools, Security Concepts

Enterprise Network Design & Configuration

- Designed and configured a secure network including subnetting, VLANs, DHCP, and DNS with troubleshooting scenarios.
- **Technologies:** TCP/IP, Subnetting, DNS, DHCP, Cisco (CCNA Level), Network Troubleshooting

System Administration (Windows & Linux Environment)

- Managed users, permissions, and system configurations in both Windows Server and Linux environments.
- **Technologies:** Windows Server, Active Directory, Linux (RH124), Bash, System Administration

Network Security Implementation

- Applied security concepts to protect networks including firewall rules, access control, and secure configurations.
- **Technologies:** Network Security, CCNA Security, CompTIA Security+, Firewalls

Penetration Testing Lab (eJPT Level)

- Performed basic penetration testing tasks including scanning, enumeration, and vulnerability assessment.
- **Technologies:** Kali Linux, Nmap, Wireshark, eJPT Tools

Malware Analysis Lab

- Analyzed malware samples using static and dynamic analysis techniques to understand behavior and impact.
- **Technologies:** Malware Analysis, x86 Assembly Basics, Reverse Engineering Tools

Basic Cloud & Infrastructure Setup

- Configured virtual environments and basic cloud infrastructure with focus on networking and security.
- **Technologies:** Virtual Machines, Cloud Basics, Networking

SKILLS

IT and Networking — Networking Fundamentals (TCP/IP, DNS, DHCP, Subnetting) | Network Configuration and Troubleshooting | System Administration (Linux and Windows) | Network Security Concepts | CCNA 200-301 | CCNA Security | CCNP (Basics / Ongoing if applicable) | CompTIA Security+ | eJPT v2 | Red Hat System Administration (RH124)

Cybersecurity and Malware Analysis — Malware Analysis and Reverse Engineering | Static and Dynamic Analysis | Assembly Language (x86 Basics) | Practical Malware Analysis (Hands-on and Theory)

Programming and Software Development — C# | Object-Oriented Programming (C#, C++, Java, Python) | Data Structures and Algorithms | Design Patterns

Web Development — HTML | CSS | JavaScript | PHP | Laravel (Basic) | MySQL

LANGUAGES

English (B2)

Arabic (Native)
